DETAILED ACTION

Priority

1. Acknowledgment is made of Amendment filed October 12, 2005.

Allowable Subject Matter

2. Claims 1-11 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The best prior art of record fails to specifically teach a memory tag having a sensor for receipt of transmitted light carrying input signals, a modulation circuit for overlay of output signals onto the power supply circuit, and a processor for processing of the received input signals and the output signals.

Kitai et al. (US 6,394,347) teaches a hybrid card 100 having an optical recording region and a non-contact type IC memory region connected to a card-side antenna coil. However, Kitai fails to specifically teach the hybrid card having a processor, which processes both the received input signal; wherein the input signal is carried by light received by a sensor, and the output signals are overlayed on the power supply circuit of the memory card.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
